

Victorian Environmental Waste Services

For more than 50 years, the family owned and operated, Victorian Environmental Waste Services (VEWS), have been providing Body Corporate, Commercial and Construction businesses throughout Melbourne with waste collection, recycling, and disposal services.

RECYCLE TODAY FOR A BETTER TOMORROW

Disposing of your waste responsibly helps minimise the amount of rubbish that ends up in our landfill. VEWS makes it easy for everyone to recycle by providing colour coded signs and bins, which represent the different types of waste streams available. All the information on the signs are in accordance with the EPA and Sustainability Victoria guidelines, to make it easy to know which items go where.

MIXED RECYCLING

We are passionate about reducing our environmental footprint and endeavour to help reduce yours by keeping our recycling clean and uncontaminated. With regular signage updates and checks on the recycling bins, we ensure we only service those bins that aren't contaminated, which helps to maximise the positive impact of sustainable recycling.

ORGANICS

Organic material is one of the best ways to help the planet. Our organic waste bins and relevant signage helps to divert unwanted organic scraps from landfill. This is then used in the creation of mulch and to give back to the planet.

PAPER AND CARDBOARD RECYCLING

As one of the most common office items to be discarded, VEWS can provide bins that are exclusively for paper and cardboard. We can also provide document destruction services for your sensitive materials.

E-WASTE

When disposed of incorrectly, electronic waste contains components that are extremely harmful to the environment. Our experienced engineers ensure we are recycling e-waste in ways that minimise your environmental footprint.

LANDFILL

All items that aren't able to be recycled through our easy-to-use colour-coded bins will be transported to an approved landfill or transfer station for disposal.

SPECIALIST DISPOSAL

Not all waste is created equal and some requires special care to ensure security and compliance with regulatory bodies. VEWS makes sure that your waste is disposed of in the most effective and appropriate way.

CONFIDENTIAL PRODUCT DESTRUCTION

With tracking systems and options for secure on-site destruction, bin swaps and lockable bins, you can have peace of mind that our document destruction service is 100% safe and secure. Also supplying a Certificate of Destruction

CONSTRUCTION/HARD WASTE

With our broad range of bin sizes, VEWS can help with all your construction and household material waste needs throughout Victoria.

LIQUID AND HAZARDOUS WASTE

Complying with state and local legislation, VEWS offer integrated hazardous and contaminated waste identification, collection, treatment and disposal services, including grease trap service.

DISPOSAL SYSTEMS TO SUIT YOUR NEEDS

From residential to large businesses, VEWS have a service that can help you to reduce your environmental footprint. Depending on your needs and the space you have to work with, the VEWS team can help tailor a solution.

REAR LIFT/FRONT LIFT

Smaller rear lift bins are a perfect solution for residential and small businesses, while larger front lift bins are suited to larger businesses with easier accessible waste collection areas. All sizes and options are available across all waste types.

PLEASE NOTE: We can service all underground car parks requiring 2.1 metre clearance.

Sizes: 120L, 240L, 660L, 1100L, 1.5m³, 3m³ and 4.5m³.

BULK BINS

Bulk bins and compactors are a great solution for dealing with large volume waste and are available across all waste types.

OUR BIN WASHING SOLUTIONS

We sanitise, disinfect, and deodorise the bin, to ensure we kill all bacteria and germs while also leaving a fresh smell.

Our bin washing vehicle is fitted with high pressure jets and a hot water system. We only use biodegradable and non-toxic products to ensure sustainability and help the environment.

PLEASE NOTE: We can wash bins in underground car parks that have 2.0 metre clearance.

ADVISORY SERVICES

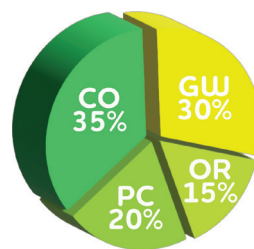

Our specialised team partners with clients to create unique and innovative solutions, that are catered to your budgets and requirements. Expert advisors guide you on the best options to help manage your varying waste needs effectively.

ACCOUNT MANAGEMENT / CUSTOMER SERVICE

Providing customised support via phone, email, and individual Account Managers, the VEWS team are on hand to assist with questions and providing advice on all your recycling and waste management queries.

REPORTING

Delivering environmental monthly performance reports, developed by the EPA and enabled by the Loadrite scale technology fitted to our vehicles and tools, VEWS are able to monitor, measure and compare for efficient resource recovery.

CO - Commingled Waste
PC - Paper & Cardboard
OR - Organic Waste
GW - General Waste

COMPLIANCE

VEWS are committed to integrating proper workplace practices and comply with the following standards:

- OHS - ISO 45001
- Environmental AS/NZS ISO 14001-2016
- Quality AS/NZS ISO 9001-2016
- Vehicle emissions - Euro 6

RESIDENTIAL AND COMMERCIAL WASTE MANAGEMENT

Providing waste management and resource recovery plans that are secure, efficient, and that affect the environment as little as possible, VEWS ensure collected waste is turned into a reusable resource helping you to:

- Reach sustainability objectives.
- Meet compliance requirements.
- Streamline waste management.
- Identify opportunities via reporting.

As a leader in waste management, VEWS promises to exceed compliance in Health, Safety, Environment & Quality by:

- Continuously reducing our carbon footprint, whilst conserving resources.
- Minimising risk to human health, communities and the wider environment.
- Ensuring all materials are used and applied in an environmentally friendly manner.
- Disposing of all waste with accordance to regulatory laws and regulations.
- Providing client education and awareness.
- Committing to provide reliable, quality service to ensure customer satisfaction.
- Guaranteeing that our vehicle fleet and equipment uphold Australia's commitment to reduce harmful CO2 emissions.
